DETAILED ACTION

Applicants amendment of claims 7 and 27, in the paper of 2/15/2005, is acknowledged and has been entered. Claims 1, 2, 7-10 and 25-27 are still at issue and are present for examination.

Applicants' arguments filed on 2/15/2005, have been fully considered and are deemed to be persuasive to overcome some of the rejections previously applied. Rejections and/or objections not reiterated from previous office actions are hereby withdrawn.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 9 remains rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for a polynucleotide comprising a nucleic acid sequence of SEQ ID NO: 3, wherein said polynucleotide encodes a polypeptide with DGAT activity and cells comprising an expression cassette comprising said polynucleotide, does not reasonably provide enablement for the cellular progeny of the cells comprising an expression cassette comprising the polynucleotide of SEQ ID NO: 3. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the invention commensurate in scope with these claims.

The rejection was stated in the previous office action as it applied to previous claims 7-10. In response to this rejection applicants have amended claim 7 and submit that this is sufficient to cause the withdrawal of the rejection . Applicants amendment has been successful in causing the withdrawal of claims 7, 8 and 10 from the rejection, however, claim 9 remains rejected under this statute for the reasons previously discussed.

As discussed in the previous response to applicants traversal, applicant is reminded that rejected claim 9, recites "The cellular progeny of the cell according to claim 8", hence, the subgenus of claimed cells do not necessarily have all of the limitations of the cells of claim 8, and thus this broader genus of "cellular progeny" is not considered enabled for all of the reasons previously made of record.

The scope of the claims must bear a reasonable correlation with the scope of enablement (In re Fisher, 166 USPQ 19 24 (CCPA 1970)). Without sufficient guidance, determination of having the desired biological characteristics is unpredictable and the experimentation left to those skilled in the art is unnecessarily, and improperly, extensive and undue. See In re Wands 858 F.2d 731, 8 USPQ2nd 1400 (Fed. Cir, 1988).

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
